

ChipLogin

Secure Windows Authentication

No more passwords on sticky notes. Tap your chip — logged in.

ChipLogin replaces shared passwords and sticky notes with secure RFID card authentication. Your employees already have the cards.

Sound familiar?

Shared Passwords

The entire shift shares one password. When someone leaves, nobody changes it.

Passwords on Sticky Notes

Passwords taped to monitors. Visible to anyone walking by.

Wasted Time

Operators standing at PCs looking for passwords. Every day, every shift.

3 Steps to Secure Login

1

Tap Your Card

The employee taps their RFID card on the reader.

2

Secure Verification

Encrypted connection with the authentication server.

3

Logged In

Windows logs in within 2 seconds.

Per-station license

Installation & setup included

Technical support

Existing card registration

Staff training

Custom solution tailoring

Why Companies Choose ChipLogin

Zero Investment in Cards

Use existing access and attendance RFID cards. Don't have cards? We supply them along with readers.

Login in 2 Seconds

Tap the card and start working. With 50 logins a day, you save hours every week.

Uncompromised Security

Encrypted connection, no passwords in circulation, full audit log. You know who, when, and where.

No Infrastructure Changes

No need to modify AD, deploy a CA, or use cloud. Deployment takes hours, not weeks.

Ideal For

Manufacturing Floors

Logistics & Warehouses

Labs & Cleanrooms

Shared Workstations
